EXAMINER'S AMENDMENT

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The specific limitations of (with respect to claim 1) "...a housing having a longitudinal axis and oppositely spaced edge portions extending parallel thereto and at an oblique angle thereto respectively along a length of said housing, said housing further having oppositely spaced end portions integral with said edge portions and extending substantially orthogonal to the axis, said housing further having substantially planar top and bottom surfaces having respective openings formed therein and extending substantially parallel to the axis, said housing further having a slot formed generally medially between said top and bottom surfaces and extending along a length of said housing; and a plurality of colored films selectively positionable into the slot and for assisting a user to differentiate a group of words in a line from a remainder of words in other lines by positioning said apparatus on the line and centering the openings therealong", (with respect to claim 6) "...a housing having a longitudinal axis and oppositely spaced edge portions extending parallel thereto and at an oblique angle thereto respectively along a length of said housing, said housing further having oppositely spaced end portions integral with said edge portions and extending substantially orthogonal to the axis, said housing further having substantially planar top and bottom surfaces having respective openings formed therein and extending substantially parallel to the axis, said housing further having a slot formed generally

medially between said top and bottom surfaces and extending along a length of said housing; and a plurality of colored films formed from plastic and being selectively positionable into the slot and for assisting a user to differentiate a group of words in a line from a remainder of words in other lines by positioning said apparatus on the line and centering the openings therealong” and (with respect to claim 10) “...a housing having a longitudinal axis and oppositely spaced edge portions extending parallel thereto and at an oblique angle thereto respectively along a length of said housing, said housing further having oppositely spaced end portions integral with said edge portions and extending substantially orthogonal to the axis, said housing further having substantially planar top and bottom surfaces having respective openings formed therein and extending substantially parallel to the axis, said housing further having a slot formed generally medially between said top and bottom surfaces and extending along a length of said housing, said housing further having a notch formed at one said end portion thereof and for assisting a user to removably insert said plurality of colored films into the slot respectively; and a plurality of colored films formed from plastic and being selectively positionable into the slot and for assisting a user to differentiate a group of words in a line from a remainder of words in other lines by positioning said apparatus on the line and centering the openings therealong” are not anticipated or made obvious over the prior art of record in the examiners opinion. For example, Gabay '635 discloses an apparatus for helping a person read which teaches a rectangular housing (figures 1 and 2) with a slot (11) and a colored film (9) positionable within the slot. However prior art of record fails to teach the housing with the structural features as claimed and prior

art of record fails to teach the use of a plurality of colored films as claimed. Furthermore, changing the shape of the housing of Gabay would not have been obvious since Gabay uses two shutter parts (4a and 4b) and the modification of the housing would render the Gabay device inoperative as intended due to the positioning of the respective shutter parts.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
